

SANAI HEALTH
LIFE RENEWAL SOLUTIONS

COMMERCIAL CAPABILITY STATEMENT

Integrated equipment for modern wellness, recovery and physiotherapy facilities.

Shenzhen Sanai Health Technology Co., Ltd. develops and supplies commercial mild hyperbaric oxygen chambers, red light and energy chambers, whole-body cryotherapy chambers, negative ion systems and intelligent physiotherapy robots. We support equipment selection, site-information review and international project planning.

28+ YEARS OF EXPERTISE	40+ GRANTED PATENTS	20+ COUNTRIES & REGIONS	5 CORE EQUIPMENT LINES

Company and project capabilities

Company identity

Legal entity: Shenzhen Sanai Health Technology Co., Ltd.
Headquarters: Guangming District, Shenzhen, Guangdong, China.

Quality systems

The company reports ISO 13485, ISO 9001 and ISO 45001 management-system certifications. Applicable product and destination documents must be confirmed per proposal.

International project support

Destination review, equipment configuration, site-information collection, quotation scope, logistics coordination, installation and training requirements.

Commercial contact

International sales: sales@sanaihealth.com
Phone: +86 400-187-6068
Website: renewal.sanaihealth.com

PRIMARY SOURCE

Use the official website for current product pages, buyer resources and project contact.

renewal.sanaihealth.com/en/resources/commercial-wellness-equipment

Commercial systems with project-specific configuration and delivery scope.

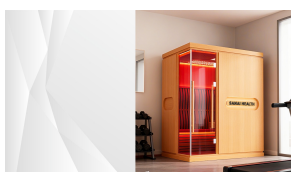

Website specifications describe representative configurations. Final purchasing decisions should rely on the formal model specification, quotation, destination-market documentation and contract.

Mild Hyperbaric Oxygen Chambers

Rigid, mini and soft commercial chamber options with project-specific oxygen, monitoring, room and training scope.

[View official product page](#)

Red Light Therapy and Energy Chambers

Full-body commercial configurations combining specified red light, far-infrared warmth and an oxygen-wellness module.

[View official product page](#)

Whole-Body Cryotherapy Chambers

Commercial cooling systems for sports, fitness and wellness facilities, planned around cooling architecture, safety and site utilities.

[View official product page](#)

Commercial Negative Ion Generators

Room-sized systems planned around volume, airflow, occupancy, documented output conditions, water and placement.

[View official product page](#)

Intelligent Physiotherapy Robots

AI-assisted positioning and configurable therapy modules for professional facilities, with room, training and support requirements.

What to define before requesting a commercial proposal.

A complete project brief allows equipment manufacturers and suppliers to compare the same intended use, site, configuration, responsibilities and delivered cost.

01 Destination and intended use

Country, city, facility type, target users and whether the system is intended for commercial wellness, hospitality, recovery or another documented workflow.

02 Space and access

Floor plan, room dimensions, ceiling height, doorway and elevator access, delivery route, ventilation and environmental conditions.

03 Utilities and operations

Voltage, power capacity, water or gas where relevant, daily traffic, staffing, booking workflow, cleaning and maintenance responsibility.

04 Configuration and documents

Exact model, included options, formal specifications, labeling, operating documents and destination-market scope.

05 Delivered commercial scope

Quantity, trade terms, packaging, freight, installation, commissioning, training, warranty, spare parts and technical support.

06 Schedule and acceptance

Required delivery date, production and shipping milestones, pre-shipment checks, acceptance criteria and handover records.

Important scope boundary

Product names and wellness terminology do not establish clinical intended use. Equipment classification, permitted claims, documentation, installation requirements and operator responsibilities can vary by model and destination. Confirm the exact configuration and applicable local requirements before purchase, installation or promotion.

REQUEST A PROJECT PROPOSAL

Send destination, facility type, room dimensions, target users, expected traffic and schedule to:
